SUMMARY

Global Cloud Network & Infrastructure Executive with 20+ years of experience designing and operating global networks and multi-region cloud backbones across AWS, Azure, GCP & cloud migrations. Owning end-to-end reliability and uptime (4-9s) for customer-facing SaaS networks and services. Building and leading 100+ person global DevOps/SRE/infra orgs that design, build, and run production networks with focus on automation, security, scalability and resilience across distributed environments (public clouds & data centers). Expert in Kubernetes, Terraform, and DevSecOps practices. Passionate about innovation, automation, and enabling development teams to deliver secure, high-quality software at scale.

CORE COMPETENCIES

- Cloud Infrastructure (AWS, Azure, GCP) & Physical data centers.
- Global cloud networking (multi-region VPC/VNet design, hybrid connectivity)
- Network reliability & SLOs (4-9s uptime, DR/BCP, incident management/crisis bridges)
- Kubernetes & Container Orchestration
- Network security (segmentation, zero-trust patterns, WAF, DDoS protection)
- DevSecOps & Compliance Automation
- Observability & Monitoring (Prometheus, Grafana, ELK, Datadog)
- Cybersecurity & Compliance (CISSP, HIPAA, PCI DSS, ISO27001, 21CFR Part 11)
- AI/ML for Cloud Network & DevSecOps Operations
- Strategic Technology Roadmapping

EXPERIENCE

CardinalTalent.ai

 **Oct 2024 - Present | SF Bay Area, CA / Remote**

- Established secure, compliant & highly available cloud infrastructure (AWS) with Terraform IaC
- Implemented SRE-based monitoring with SLOs/SLAs with 24x7 alert/response to achieve 99.99% uptime.
- Drove the building/training and implementation of GenAI/LLM models for the AI Interviews, Resume and Job Matches.
- Implemented AI-driven monitoring and anomaly detection using LLMs and automated remediation pipelines covering application and network signals (latency, error rates, saturation).

EverHealth, an EverCommerce Company

 **Jul 2023 - Oct 2024 | Denver, CO / Remote**

- Directed production cloud network and infrastructure for 10+ SaaS products (AWS), defining regional VPC, peering, and connectivity patterns supporting 99.99% uptime.
- Implemented BCP/Active-Active HA for a complex legacy application running in CoLocation data centers, designing network segmentation for security and seamless data transmission.

- Executive incident commander for Sev-1/Sev-0 incidents, leading cross-functional war rooms and driving MTTR improvements
- Implemented centralized monitoring and observability (ELK, Prometheus, Datadog), improving incident response time by 50%.
- Implemented SRE-style on-call and runbooks for global crisis bridges, and converting revenue impacting customer situations into referenceable customers.
- Partnered with CISO to embed **DevSecOps** and IaC security, ensuring compliance with **HIPAA and SOC2/ISO27001** standards.

Signant Health

 **2019 – 2023 | Philadelphia, PA / Global**

- Built and scaled a global DevOps and SRE team from 20 to 100+ engineers, modernizing architecture and delivery pipelines.
- Migrated complex systems from on-prem colocation to **AWS & Azure global network architectures** (multi-region VPC/VNet, VPN/Direct Connect), cutting hosting costs by \$3M+ annually.
- Designed and implemented DR/BCP, including **cross-region network failover** achieving <5-minute RPO and 2-hour RTO.
- Implemented **Monitoring & Telemetry** (NewRelic, AppDynamics, Prometheus, Grafana, Sentry etc.) to achieve 4-9s uptime.
- Achieved and maintained **SOC2 and ISO27001** certifications through strong governance and compliance automation.
- Modernized applications to containerization using Kubernetes network / service mesh / ingress.
- Led executive crisis bridges for global outages, standardizing incident command structure and postmortems, and de-escalated high profile issues occurred during Covid Vaccine trials.

Baker Hughes, a GE Company (BHGE)

 **2016 – 2019 | San Ramon, CA**

- Built 50+ global DevSecOps teams, defining career frameworks, automation standards, and operational excellence KPIs.
- Delivered **multi-cloud strategy** (AWS, GCP, Azure) including **network topology, connectivity, and security controls** supporting \$100M+ enterprise contracts.
- Achieved **99.99% uptime** via robust SLOs, telemetry, and incident management frameworks.
- Implemented CI/CD automation and IaC pipelines reducing deployment times from hours to minutes.
- Established security controls and SIEM integration (Sumo Logic) for real-time anomaly detection.

Veeva Systems

 **2013 - 2016 | Pleasanton, CA**

- Scaled infrastructure and DevOps operations through hypergrowth and IPO; managed \$10M+ annual infrastructure budget.
- Implemented CI/CD and configuration management (Puppet, Ansible) across multi-cloud environments.
- Expanded global hosting capacity 5x while maintaining 21 CFR Part 11, SOC 2, and ISO 27001 compliance.
- Improved uptime to 99.95%+ across all environments via proactive monitoring and IaC automation.
- Integrated acquisitions into unified infrastructure operations, reducing onboarding time by 60%.

Oracle / PeopleSoft

Pleasanton, CA

- Led global SaaS hosting and infrastructure teams (200+ staff).
- Scaled Oracle CRM OnDemand from 50 to 500+ environments, saving \$15M annually through automation.
- Directed central architecture for PeopleSoft Enterprise HCM 9.0 and Fusion migration initiatives.

EDUCATION

Indian Institute of Science (IISc) Master of Science • Mechanical Engineering • 1987 - 1989

LICENSES & CERTIFICATIONS

(ISC)2 Security CISSP (ISC2-CISSP) Certificate # 738367 • Issued Jan 2022 - Expires Dec 2027

HONORS & BOARDS

- Patent: Database Index Monitoring System (Patent Number: 8626729) USPTO • 2009
